

# Nov 3rd Speaker!

- Craig O'Neill (UTM alumnus, successful entrepreneur, interesting speaker)
- 3 pm (during cohort session)
- one week from today
- You don't want to miss this!

# Extra Office Hours

- 1-2 Thursday (tomorrow)
- 10-11 Friday
- and regular hours today !!

# split\_on\_separators

original	seps	expected
'xxxAxx'	'A'	['xxx','xx']
xAxxAxxx	'A'	['x','xx','xxx']
xAxxBxxx	'AB'	['x','xx','xxx']

# split\_on\_separators

- consider last case `'xAxxBxxx', 'AB'`
- what would you get if you just called `original.split('A')`?  
`['x', 'xxBxxx']`
- Now what could you do to get what you really want?
- Try it on `'xAxxBxxxAxBxxBxxABx', 'AB'`
